

## **FREE ROBOT! FREE TRAINING! FREE COMPETITION!**

**That's right!! Lakeside High School in partnership with SimplyTronics is hosting a local robotics competition that all schools and kids can access. No expertise needed, no large budgets necessary, and no kids have to stand on the sideline.**

Join us to learn how to assemble, program, and operate the Arduino/Parallax Robot. You will walk away with enough information to start a robotics program that can access and compete in the Lakeside Robotics Rumble on February 27<sup>th</sup> 2015.

Lakeside in partnership with SimplyTronics will **LEND** you a Robot kit with all the necessary equipment to compete in our Third Annual Robotics Competition, just by coming to this **FREE** training. If you need more than one bot, we can do that too! Mr. Alvarez, President of SimplyTronics, has trained educators across the globe on these bots and their programming. He has agreed to donate his time and expertise to assist you in bringing robotics to your school. If you already have the Shield-Bot/ST Ed Robot bring it in for a refresher lesson! We will be checking out bots to any schools that want to participate in hopes of increasing Robotics programs at all schools. If you would rather purchase your own bot we will have some available at cost!

**COACH'S TRAINING:** Tuesday October 20<sup>th</sup>, 8AM-3PM

7 Clock hours will also be available

**WHERE:** Lakeside High School, 5909 Highway 291, Nine Mile Falls WA

**RSVP to Brent Osborn at Lakeside High School-**

**[bosborn@9mile.org](mailto:bosborn@9mile.org)**

***Please RSVP as soon as you can so we can order bots***
